Competition target

OUR TEAM

SRJC Baja SAE is a student-run engineering team at Santa Rosa Junior College. We are building our first competition vehicle and giving students practical experience across chassis, vehicle dynamics, powertrain, manufacturing, electrical, simulations, and business.

Students learn by doing: CAD and analysis, machining and welding, wiring and instrumentation, testing, project planning, technical communication, budgeting, and sponsorship. Students from any major and experience level can join and contribute.

WHERE SPONSORSHIP GOES

FROM RAW MATERIAL TO A RUNNING CAR

Sponsorship turns student design work into hardware we can manufacture, test, improve, and take to competition.

TYPICAL NEEDS

- Steel, aluminum, fasteners, bearings, and fabrication consumables
- Engine, CVT, drivetrain, brakes, steering, suspension, wheels, and tires
- Sensors, wiring, instrumentation, and data acquisition
- Tooling, machining, welding, fixtures, and outside manufacturing support
- Safety equipment, testing materials, replacement parts, and vehicle transport
- Competition registration, travel, and logistics

CURRENT TARGET

BAJA SAE ARIZONA

April 29 - May 2, 2027

Marana, Arizona

Baja SAE combines design, cost/business, technical inspection, dynamic driving events, and endurance. Our goal is to arrive with a safe, tested vehicle - not just a finished build.

RECOGNITION LEVELS

SPONSORSHIP LEVELS

Cash and in-kind support are recognized by documented value. Benefits are coordinated with the team and SRJC and may be adjusted to fit vehicle space, event rules, and institutional requirements.

COPPER

Under \$250

- Name or logo on website sponsor wall
- Team thank-you and acknowledgment

BRONZE

\$250 - \$999

- Website sponsor recognition
- Social media thank-you
- Team appreciation letter or photo

GOLD

\$1,000 - \$4,999

- All Bronze recognition
- Logo on vehicle, space permitting
- Additional sponsor recognition during the season
- Opportunity to share recruiting materials with the team

PLATINUM

\$5,000+

- All Gold recognition
- Prominent website and vehicle placement, space permitting
- Dedicated sponsor recognition post
- Coordination on recruiting or team-engagement opportunities

Before any benefit is promised, the team confirms what is permitted and practical. Monetary and in-kind donations are coordinated through SRJC-approved channels. Contact us for a custom package when a contribution does not fit a standard tier.

CURRENT PARTNERS

THANK YOU FOR INVESTING IN STUDENTS

WHY PARTNER WITH SRJC BAJA SAE

A DIRECT INVESTMENT IN LOCAL ENGINEERING TALENT

- Help students turn classroom theory into real design, manufacturing, testing, and project decisions.
- Connect your organization with motivated students across mechanical, electrical, software, manufacturing, and business work.
- Support a growing community-college engineering team representing Santa Rosa Junior College at a national SAE competition.
- Create visible, specific impact through materials, components, software, manufacturing support, mentorship, or direct funding.

PARTNER WITH US

HELP US BUILD, TEST, AND COMPETE

We welcome financial support, materials, components, software, manufacturing services, technical mentorship, and other in-kind contributions.
